Art Unit: 1756

The following is an examiner's statement of reasons for allowance:

Applicants correctly argue that the reference example 75 fails to disclose the compound containing at least one fluorine atoms of the present formula IV. Therefore, the rejections over WO 01/46336 have been withdrawn. Also, WO '336 does not provide the motivation to add the compound of the present formula B to the present formula A to achieve the present invention (see page 12, lines 25-32 or US 7,001,646 col. 7, lines 1-20).

The liquid-crystal mixtures from the prior art (including cited pto-892 herewith) do not achieve the requisite combination of low threshold voltage and low birefringence of the present invention. The present liquid-crystal mixtures having threshold voltages of less than 1 V and typically in the range $V_0 = 0.65 - 0.75$ V (see page 2, lines 27-35 in the specification).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shean C. Wu whose telephone number is 571-272-1393. The examiner can normally be reached on 9:30 AM to 6:00 PM.
